Make entire cabinet fronts up to 2800 mm in width disappear flush with the outer face with a single manual operation. Two doors can be folded and slide in at the side with this well thought-out fitting system. The slide-in loss is a mere 73 mm using this system. You even gain space in the room, since the doors are stored away flush in the furniture cabinet or in the wall pocket.

$$\begin{aligned} T2 &= TB + 73 \text{ mm} - Q4 \\ E2 &= T2 - 73 \text{ mm} \\ Q4 &= 75 \text{ mm} + S \end{aligned}$$
