

TIP UP

Bed positioning system

Single : 400N

Double : 500N / 600N / 700N

TIP UP

TECHNICAL SPECIFICATIONS

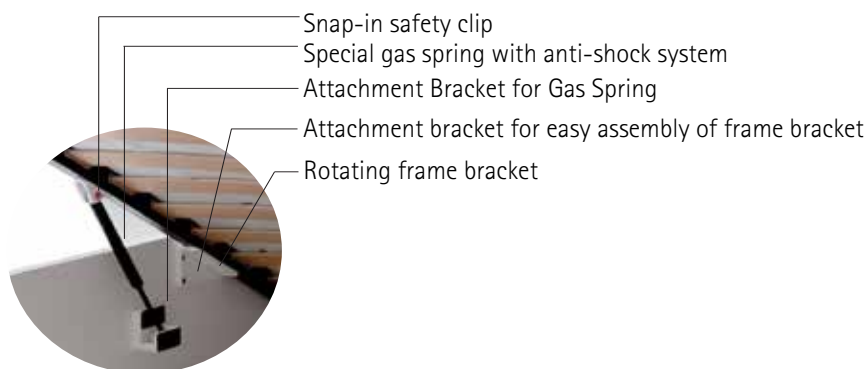

TipUp – Bed positioning system (Storage Beds)

Fingertip Operation

TipUp® fits to any type of bed frame: wooden or steel, spring framed or slated.

Its 3 different assembly positions minimize the required gas-spring force (400N - 600N) thus making its use suitable with any type of mattress. Our uniquely developed, shock-absorbing gas-spring mechanically prevent abrupt falls or sudden closing.

TipUp® innovative design put an end to "beartrap" risks in traditional mechanisms. The complete system complies with most stringent safety regulations.
