

# PULL OUT EXTENSION TABLE 540

m  
n

With one simple gesture the front of a cupboard can now be transformed into a desktop. There are no legs or supports to get in the way when sitting at the desk, since the guide used in the mechanism is extremely strong and sturdy. Attached to the front panel, it allows you to use the space inside to store small household appliances and the tabletop to operate them. It is also an intelligent and practical solution for the children's room, where it may be used as a desktop for studying or using the computer.
